  - Be part of a cross functional internal and external team developing , delivering business strategy alongside our strategic investors and stakeholders
  - Developing solutions, monitoring and recording project progress .
- **Project and programme management**
  - Support bid writing process and supporting data generation and approval
  - Develop, refine and approve project planning activities including resource and timing plans
  - Develop business cases and financial models for review and approval
  - Work across the business to ensure alignment of objectives

- Manage third party engineering and clients in order to delivery project and programs on time and budget
- **Supply chain management**
  - Research and identify supply chain opportunities to support scale up
  - Lead on boarding of new suppliers
  - Manage global replication and scale up of 2<sup>nd</sup> life battery supply chain
  - Support third party contract assembly operations
- **Quality systems**
  - Work across full business value chain to map and develop robust business processes and policies
  - Manage stakeholder to ensure alignment and robust implementation
  - Support formal accreditation processes
- **Business Systems**
  - Prospect and identify potential business support systems
  - Manage cross business implementation and transition

**Benefits:**

- Flexible pay depending upon candidate
- Modern workplace with plenty of innovative projects to get involved with
- Plenty of free on-site parking
- The ability to drive your own development through freedom to operate in a fast-growing SME
- Pizza day!

**Requirements:**

- A highly efficient, structured and motivated approach to work
- Personable approach and 'can do' attitude
- Excited about clean technology and related benefits
- Exceptional relationship building skills
- A commitment to driving sustainability objectives
- Strong IT skills, in Excel and Microsoft Office
- Strong communication skills both written and verbal

**Essential Qualifications:**

- Minimum 2:1 bachelor's degree within a Business, Management or related discipline background.
- Have some experience in a Business-related department (not essential).
